

Details make the difference.

Kappler innovation comes through with a wide range of specialty products. From unique garments to products that support your protective apparel, Kappler has a proven solution.

ChemTape®

ChemTape is Kappler's patented chemical-resistant tape designed specifically for protective apparel. Provides added assurance for taping around gloves, boots, respirators and storm flaps, plus shelter-in-place applications. Rolls are 2" X 60 yd (48 mm wide and 55 meters long); 24 rolls per case, Style 99402 YW.

Zytron® 300 Half C Jacket

Kappler's Zytron 300 Half C Jacket is ideal for supplied-air work applications. The flat back design includes hood with PVC faceshield, double storm flap with hook and loop closure, and attached CP Cuff Option for easy glove taping. Loops for air system are attached inside the hood. Style Z3H763 (style Z3H763-30 includes tubes and Nupro valve), 6 garments per case.

Attached CP Cuff Option makes taping fast and easy. See details on reverse.

ChemScan™ Labels

Just scan the label with your mobile phone's QR reader for immediate access to a complete list of chemicals tested against your garment's protective fabric. Quick, accurate and only from Kappler.

Kappler's Digital Pressure Test Kit is easy to use and extremely accurate.

Kappler's automated Digital Pressure Test Kit improves the efficiency and accuracy of gas-tight garment tests for both ASTM and CE methods. Our unique design features a digital readout for more accurate testing, while a large LCD touchscreen allows easy test criteria selection and data input. All fittings and hoses are included – the user simply provides an air supply with a 1/4 inch MNPT fitting. Press START and the test is performed automatically, allowing the user to handle other duties while the test is in process. For easy and accurate record-keeping, test data can be copied to the provided USB stick via the built-in USB port. Complete operating instructions are included and also available at kappler.com. Style AKMOC.

Cooling Vest

The Kappler Cooling Vest with patented Phase Change Material is lightweight and provides hours of cooling. Available in two cooling capacity sizes, in mesh or FR Cotton. Contact Customer Service for style numbers.

Male Glove Insert Cones

Kappler's insert cones interface glove to suit and provide smooth taping surface. 1 pair per case, Style AGOAR.

ChemTape® Responder ID Kit

Large, easy-to-read identification numbers enhance safety where worker identities are obscured. Self-adhesive, easy to apply, set includes 0-9. Style 99415.

CP Cuff Option For Any Suit

Taping gloves with ChemTape® has become standard procedure for good protection. Our CP Cuff Option, available on any Kappler taped seam chemical garment, makes the job faster, easier and more effective. Eliminate chemical burns on hands and wrists – ask Customer Service about adding the CP Cuff Option to your next apparel order.

2N1™ Glove System features a unique liner system that prevents inner glove inversion.

Kappler's 2N1™ Glove System solves a common, persistent problem for chemical suit users. A true innovation, the 2N1 prevents the fingers of the inner liner glove from "inverting" or being pulled inside-out when the user removes a hand from the double-glove configuration common to certain gas-tight garments. This simple yet effective improvement allows the user to easily remove or reinsert the hands into the glove without the annoying inversion. This is especially helpful when a user needs to free the hands while inside the suit, to adjust the respirator face piece or other equipment and clothing. The 2N1 also provides improved comfort and manual dexterity with a double-glove configuration. From the moment you insert your hands, the benefits are obvious and immediate. The 2N1 Glove System from Kappler – where the latest innovation is always in reach. Contact Customer Service for style options.

(page 1 on reverse)

Unique installation technique using rigid glove ring allows larger opening, which makes it easier to insert or withdraw hands.

Fingers of inner glove stay in place when hands are removed.
