

# 2N1<sup>®</sup> Glove System

*Innovative configuration  
also provides improved  
comfort and dexterity.*

*Unique installation technique  
using rigid glove ring  
makes it easier to insert or withdraw hands.*

## THE INSIDE STORY ON HAND PROTECTION.

**Kappler's 2N1<sup>®</sup> Glove System includes a multilayer composite that prevents glove inversion when removing hands inside the suit.**

Kappler's 2N1<sup>®</sup> Glove System – a true innovation that eliminates the problem of inner glove inversion when the user removes a hand from the double-glove configuration common to gas-tight garments.

This allows the user to easily remove or reinsert the hands into the glove without the annoying inversion. This is especially helpful when a user needs to free the hands while inside the suit to adjust the respirator face piece or other equipment and clothing. The 2N1 Glove System also provides improved comfort and manual dexterity with a unique glove configuration. Contact Customer Service for style options.

*The 2N1 Glove System comes standard on Kappler Zytron<sup>®</sup> 500 Hazmat styles, and NFPA Certified styles in both Zytron<sup>®</sup> 500 and Frontline<sup>®</sup> 500 fabrics.*

*"This is a simple solution to a common problem, but it took some true innovation to make the new glove system dependable. Kappler has always led the industry in protective fabric and garment design, and now we can offer users this glove improvement with very tangible benefits."*

*George Kappler,  
CEO and Founder*

**WARNING:** The information contained herein is based on technical data that Kappler believes to be reliable. It is subject to revision as additional knowledge and experience are gained. Please visit our website at [www.Kappler.com](http://www.Kappler.com) ("Kappler Website") for the most up-to-date product information and specifications. All pamphlets, brochures or other literature or printed material may contain information that is not as current as the information on Kappler's website. Additionally, there are uses, environments and chemicals for which Kappler products, garments and/or fabrics are unsuitable. The user has the responsibility to review all available data and verify the product, garment and/or fabric is appropriate for the intended use and meets all specified government and/or industry standards for such use. The user should review all available information on the Kappler Website, product labels and QR codes to understand the appropriate uses and limitations of Kappler products, garments and fabrics.

**CAUTION:** These garments are designed for protection of personnel against short duration thermal exposures. Do not use for firefighting applications. Minimize exposure to open flame or intense heat.

2N1 Glove System's standard configuration (Butyl + Barrier Glove) does not contain PFAS Chemistry.
