Kappler’s automated Digital Pressure Test Kit improves the efficiency and accuracy of gas-tight garment tests for both ASTM and CE methods. Kappler’s unique design features a digital readout for more accurate testing, while a large LCD touchscreen allows easy test criteria selection and data input. All fittings and hoses needed to connect a garment for testing are included in the kit – the user simply provides an air supply with a 1/4 inch MNPT fitting.

Press START and the test is performed automatically, allowing the user to handle other duties while the test is in process. For easy and accurate record-keeping, test data can be copied to the provided USB stick via the built-in USB port. Complete setup and operating instructions are included and also available at kappler.com.
