ProVent® Plus Delivers Proven, Breathable Biohazard Protection For Many Applications.

- Two unique NFPA 1999 certified styles for biohazard protection against blood and body fluids, fentanyl and other bio-particles.
- ProVent Plus fabric and seams pass ASTM F1671 blood and viral penetration test.
- Tactical-style NFPA garment designed for Law Enforcement drug units meets CDC/NIOSH guidelines for fentanyl protection, also consistent with IAB recommendations. *(photo on back)*
- Breathable protective fabric provides enhanced comfort.
- Available styles include gowns, lab coats.
- ProVent Plus Applications: Patient care and other healthcare settings, law enforcement drug response, lab and diagnostic services, pharmacy work, autopsies, mortuary services.

ProVent® Plus offers two styles for certified NFPA 1999 protection.

ProVent Plus is available in two coverall styles certified to NFPA 1999, with proven protection designed for healthcare, emergency response and law enforcement personnel.

Healthcare and Emergency Response (style PPH439-99 shown at right) Economical single-use garment ideal for healthcare and emergency response situations where there is potential blood and viral exposure including Ebola and other biohazards. This is the only single-use garment certified to NFPA 1999 while also meeting OSHA and CDC guidelines for biohazard exposure.

Law Enforcement (style PPH459-99 shown below) Tactical-style garment designed for law enforcement drug unit response when fentanyl and other bio-particle hazards are potentially present. Provides a cost-effective multi-use, single-exposure alternative to expensive reusable garments. In addition to NFPA 1999 certification, this style also meets PPE Guidance for Fentanyl Exposure issued by IAB and CDC/NIOSH.

Style PPH459-99 includes Sure-Fit® respirator face piece seal and rear entry design to facilitate doffing and reduce cross-contamination.

Shown above are typical garment types for this fabric. View standard styles at kappler.com or call Customer Service for custom options.

Our labels work harder, and smarter. Kappler's unique SMART™ label makes sizing easy to see, and a quick QR code scan provides complete chemical data plus extensive suit details.

Style PPH439-99 meets OSHA and CDC guidelines as part of a system of components with other protective equipment including respiratory, eye and face protection, examination gloves, boot/shoe covers and over aprons.

WARNING: This information is based on technical data that Kappler believes to be reliable. It is subject to revision as additional knowledge and experience are gained. The website will contain Kappler's most up-to-date product information, and customers who receive pamphlets, brochures or other literature should be aware that such "hard copy" information may not be as current as the information on Kappler's website. Customers also should recognize that there are uses, environments and chemicals for which Kappler products, garments and/or fabrics are unsuitable. It is the responsibility of the user to review available data and verify that the product, garment and/or fabric is appropriate for the intended use and meets all specified government and/or industry standards. Also, the customer should review all available information on the website to understand the uses – and limitations – on ALL products, garments and fabrics which Kappler makes available. **CAUTION:** Do not use for fire protection. Avoid open flame or intense heat.

ProVent Plus does not contain PFAS chemistry.
